

DBLAB Student Logon Instructions with Remote Desktop Client

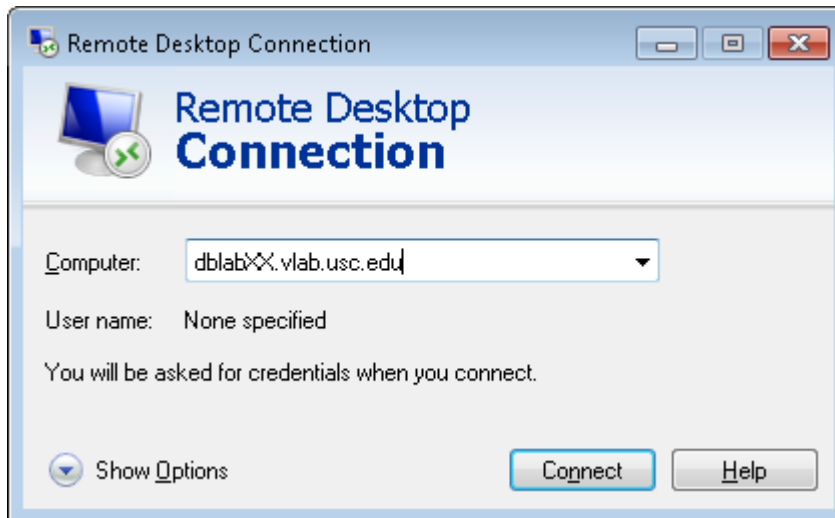

Notes:

- Server access is assigned by TAs and Faculty.
- If you are on USC Wireless Network or connecting from off campus, you need to connect via USC VPN before following the instructions below. USC VPN instructions can be found here:
<http://www.usc.edu/its/vpn/>
- If you are on a Mac, you can download the remote desktop client from the Mac App Store.
- Instructions below are documented from the Windows operating system.

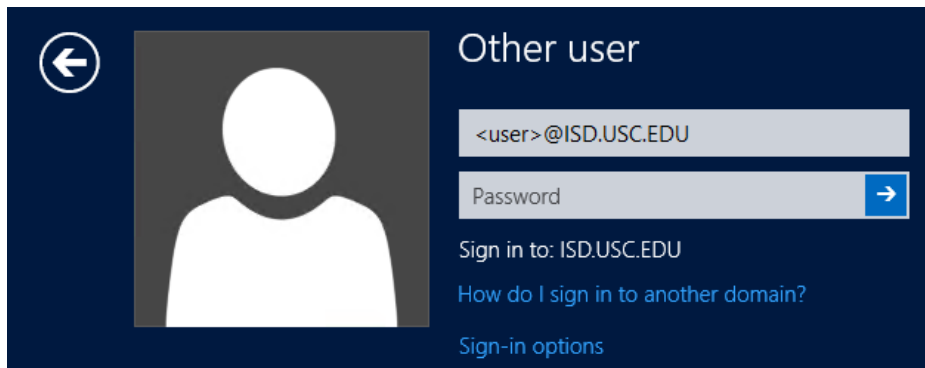

- 1) Launch your workstations Remote Desktop Connection application (Start | Accessories | Remote Desktop Connection).

- 2) Connect to your assigned server (i.e. dblabXX.vlab.usc.edu).

- 3) Logon using your USC username and password. Your username must be entered in the following format: USCUserName@ISD.USC.EDU.

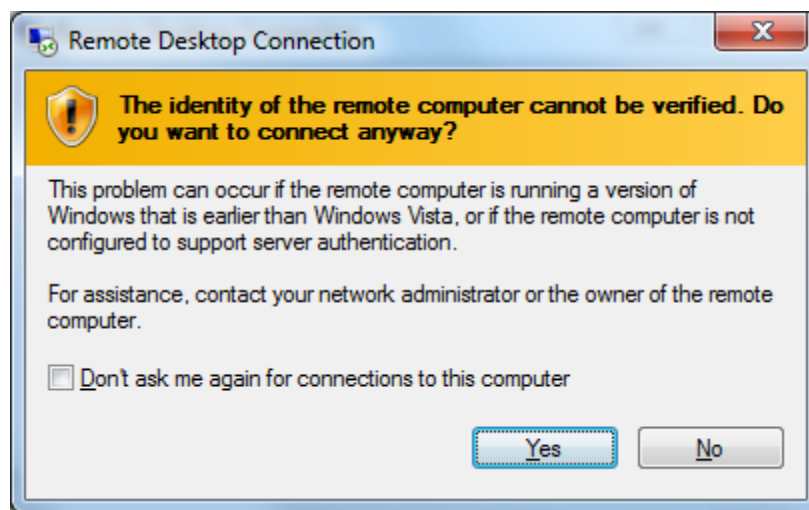

- 4) Once logged on, you will also see your Network Folder assigned as the V: drive.

FAQ

- If you get the following prompt, click the box next to “Don’t ask me again for connections to this computer” and click on Yes.

- To determine the server name, Right-Click “My Computer” and the server name will be displayed next to the “Computer name” field.
- For server assistance, please contact your TA.
